In Conclusion

- The overwhelming neutrality in the text (specifically the title) itself, can hide the true opinions of those in the subreddit.
- Predictive models are incredibly difficult to perform on these subreddits in particular and potentially other political subreddits.
- The issues in which the subreddits most differ on, is primarily due to r/Libertarian focusing more on surveillance and misinformation in the media while r/Neoliberal is concerned with global politics, climate, and sitting senate representatives.
- They both discuss tax, covid, stimulus, china and other current topics relatively often
